

IP Telephony System

Full Featured Internet Telephone Key System for Small Businesses and Home Offices

The SPA9000 marries the rich feature set of legacy PBX telephone systems with the convenience and cost advantages of Internet telephony. It has common key system features such as an auto attendant, shared line appearances, three way call conferencing, music on hold, "follow me" calling, and many more. The SPA9000 opens up access to the benefits of Voice Over IP, including low cost long distance service, phone number portability, and one network for both voice and data.

The SPA9000 is so easy to configure that a fully working system can be setup up in minutes. New phones are automatically detected and registered when they are

connected to the SPA9000. The SPA9000 has an integrated web server that allow features to be configured using a web browser. The web server has multiple levels of password protected access to user and service level features. Service level settings may be locked by the Internet Telephone Service Provider to ensure they are not accidentally corrupted. The Service Provider can remotely update the software and settings through a secure encrypted connection.

as as any

With it's integrated router, the SPA9000 can be either connected directly to the internet connection, or connected indirectly through another router. The SPA9000 has separate WAN and local network Ethernet ports. The WAN connection can be connect through DHCP, a fixed IP address, or through DHCP. The LAN port can assign IP addresses to IP telephones and computers using NAT and DHCP.

While the SPA9000 will work with any SIP compatible IP telephone, it is the ideal host for Linksys business telephones, such as the SPA941, SPA942, and SPA962. With little additional configuration, the SPA9000 supports the advanced features of these phones, such as shared line appearances, hunt groups, call transfer, call parking lot, and group paging. With its two FXS ports, the SPA9000 can support traditional analog devices such as telephones, answering machines, FAX machines, and media adapters.

CISCO SYSTEMS

PRODUCT DATA

Internet phone system with features comparable to traditional high end Key Systems.

Run an entire office on just one IP phone line. Up to sixteen simultaneous calls on one line!

Easily upgrade from exiting Centrex DID systems.

Works with most Internet Telephone Service Providers see www.linksys.com for list of providers.

Model No. SPA9000

PRODUCT DATA

Model No. SPA9000

Features

- SIP Application Server, Proxy, Registrar and Location Server (RFC3261)
- Multiple Service Provider Lines / SIP Account Support (4)
- Shared Line Appearance (SLA)
- Automated Attendant (AA)
- Configurable AA Answer Delay
- Interactive Voice Response (IVR)
- Recordable IVR Prompts

٠

- Automatic Call Distribution (ACD)
- Configurable Call Routing
 - Least Cost Routing
 - Multiple DID Numbers Per VoIP Line
 - Call Routing to Multiple Extensions or Targeted User
 - Call Hunting Sequential, Round Robin, Random
 - Phone Configuration and Management Server
 - Discovery and Configuration of IP Phones
 - Assignment of Extension
 - Assignment of Dial plan
 - Proxy Logging of SIP Messages
 - Phone Firmware Upgrade Management
- Corporate Directory with Automatic Update
 - Configuration and Maintenance via Web Interface (Local or Remote Status Display of All Connections
- Remote Configuration via
 HTTPS with XML Formatted Files
 HTTP or TETP with 256 Bit Engrated Binary E
 - HTTP or TFTP with 256-Bit Encrypted Binary Files
- Call Park User Definable Parking Space Number
- Call Unpark
- Call Transfer
- Call Forward
- Group Paging
- Intercom
- Directed Call Pick Up
- Group Call Pick Up
- Music / Information via Streaming Audio Server (SAS) for Calls:
 - On Hold
 - Parked in the Parking Lot
- Being TransferredSimultaneous Ringing (Find Me Service)
- Do Not Disturb
- Voice Mail Integration Service Provider Based
 Voice Mail Notification via SUBSCRIBE / NOTIFY
 - Forward Call Directly to Voice mail
- Integrated Media Proxy or Direct RTP Routing to ITSP
- Differentiated Services (DiffServ) / Type of Service (TOS) Support
- Two FXS Ports for Phones, Fax machines, Media Adapters
- Voice encoding according to G.711 (64kbit/s)
- Fax Support using G.711 Pass-Through or T.38
- Echo Cancellation (G.165)

Additional Features when used with SPA Phones

- Line Status Active Line Indication, Name/Number
- Digits Dialed with Number Auto-Completion
- Call Hold

•

- Call Waiting
- Call Transfer Attended and Blind
- Call Conferencing
- Automatic Redial
- Call Pick Up Selective and Group **
- Call Swap
- Call Forwarding Unconditional, No Answer, On Busy
