The BNC connector, the most popular coaxial connector series in the world, features a two-pin bayonet coupling system for quick and reliable engagement and disengagement.

● Wide range :

RADIALl's BNC connectors are available with two characteristic impedances 50Ω and 75Ω; and, they are completely intermateable with one another.

The BNC range offers cable connectors for both flexible or semi-rigid cables, panel and PCB mount receptacles including press mount, through hole and press fit pins connectors. In series adapters and between series adapters including PUSH-ON type are also available.

RADIALl offers you also a low cost range called commercial BNC, whose characteristics are compared to those of the standard BNC in the chart here under.

● Convenient 3-piece design :

A range of crimp type cable connectors (straight and right angle models) features :

a 3 piece design : single piece body + center contact + outer ferrule,

You can find them with the "single piece body" mention on note.

● Fast and reliable cable attachment :

The cable connectors can be either fully crimped or soldered/crimped, offering full flexibility for high volume production with standard manual or pneumatic tooling : fast and reliable.

- ☞ the center contact can be either crimped or soldered,
- ☞ the outer contact is attached to the cable by crimping a ferrule.
