RACK CABINETS

Glass and perforated door

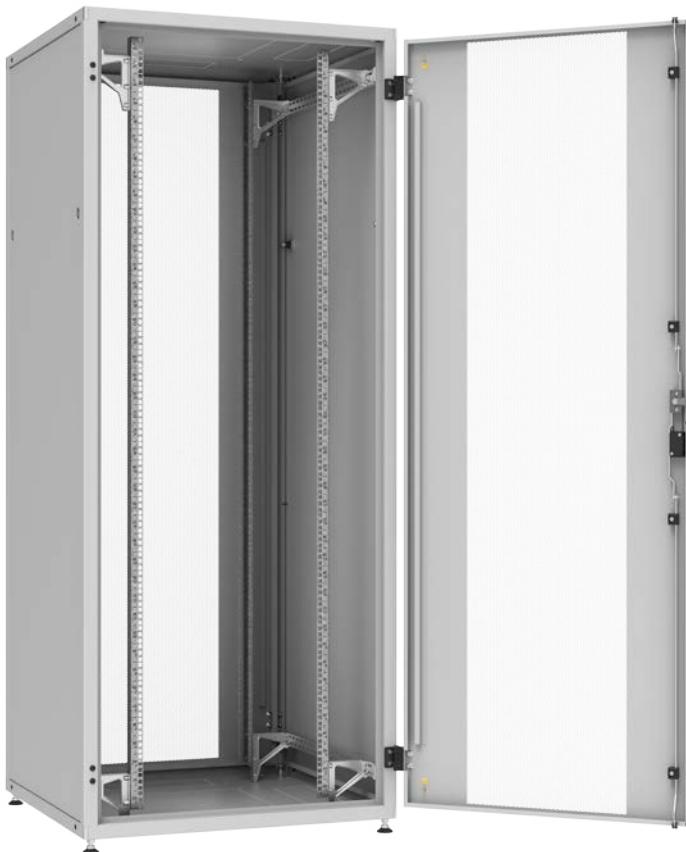

For all types of cabinets of the LC-50 series, we offer front or rear doors for complete or replacement, in all-glass or perforated design.

These serve as protection against unauthorized access and at the same time make it possible to ensure suitable operating conditions for the installed equipment.

All-glass doors are made of clear tempered safety glass in accordance with safety standard EN 12150-1.

Perforated doors are offered in two variants, as single-leaf or double-leaf versions for cabinets with a width of 600 and 800 mm.

The surface treatment is made by powder technology in the shade RAL7035.
